

Summer Reading for AP Chemistry

- Take home one Edvantage Science “AP Chemistry 1” book before the last day of school.
- Read Chapters 1, 2, 3, and sections 4.1, 4.2 before school starts.
- This should be a review of general chemistry that you had sophomore year.
- Make a list of questions that you have.
- Make a list of the specific topics that you are not clear on and need more practice.
- This will allow us to spend more time on new topics and concepts during the year.
